JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Ab initio calculation
HeI photoelectron spectroscopic (PES) studies of the electronic structure for alkyl nitrites $CH_3(CH_2)_nONO$ ($n = 0, 1, 2, 3$) 19
Acridone
The photoelectron spectra of xanthone, thioxanthone, and acridone 71
Alkyl nitrite
HeI photoelectron spectroscopic (PES) studies of the electronic structure for alkyl nitrites $CH_3(CH_2)_nONO$ ($n = 0, 1, 2, 3$) 19
Angle-resolved X-ray photoelectron spectroscopy
Olefin metathesis catalyst. III. Angle-resolved XPS and depth profiling study of a tungsten oxide layer on silica 151
Auger CVV
Si *CVV* Auger line shapes: tight binding model with inter-atomic phases 79
Auger electron spectroscopy
Characteristic depth of the excitation function for Auger electrons in the noble metals Cu, Ag and Au determined by inelastic background analysis 173
Auger spectrum
The *KLL* and *KLM* Auger spectra of 3*d* transition metals, $Z = 23–26$ 31

Catalyst
Characterization of Venezuelan laterites by X-ray photoelectron spectroscopy 135
Olefin metathesis catalyst. III. Angle-resolved XPS and depth profiling study of a tungsten oxide layer on silica 151
Characteristic depth
Characteristic depth of the excitation function for Auger electrons in the noble metals Cu, Ag and Au determined by inelastic background analysis 173
Chemical shift
Screening in resonant X-ray emission of molecules 125
Cini–Sawatzky
Si *CVV* Auger line shapes: tight binding model with inter-atomic phases 79
Copper film
Influence of non-dipolar terms on the Cu $L_{2,3}$ and $M_{2,3}$ electron energy loss fine structure (EELFS) spectra in transmission and reflection mode 1

Depth profiling
Olefin metathesis catalyst. III. Angle-resolved XPS and depth profiling study of a tungsten oxide layer on silica 151
Dielectric function
Wavenumber dependence of the energy loss function of graphite and aluminium 23

Electron energy loss spectroscopy
Influence of non-dipolar terms on the Cu $L_{2,3}$ and $M_{2,3}$ electron energy loss fine structure (EELFS) spectra in transmission and reflection mode 1
Vibrational excitations in electron energy loss spectroscopy of liquids 145
Wavenumber dependence of the energy loss function of graphite and aluminium 23
Electron microscope
Influence of non-dipolar terms on the Cu $L_{2,3}$ and $M_{2,3}$ electron energy loss fine structure (EELFS) spectra in transmission and reflection mode 1
Electronic structure
Electronic structure of tantalum subcarbides studied by XPS, XES, and XAS methods 179
HeI photoelectron spectroscopic (PES) studies of the electronic structure for alkyl nitrites $CH_3(CH_2)_nONO$ ($n = 0, 1, 2, 3$) 19
Energy loss function
Wavenumber dependence of the energy loss function of graphite and aluminium 23
Enol
Electronic structure of uracil and uridine derivatives studied by photoelectron spectroscopy 61

Glass
Soft X-ray induced darkening of glass surfaces 75

He I photoelectron spectra
Electronic structure of uracil and uridine derivatives studied by photoelectron spectroscopy 61
The photoelectron spectra of xanthone, thioxanthone, and acridone 71
HeI photoelectron specotroscopy
HeI photoelectron spectroscopic (PES) studies of the electronic structure for $Si(CH_3)_nCl_{4-n}$ (n = 1, 2, 3) compounds 13
HeI photoelectron spectroscopic (PES) studies of the electronic structure for alkyl nitrites $CH_3(CH_2)_nONO$ (n = 0, 1, 2, 3) 19
Homonuclear diatomic molecules
Selectively excited X-ray emission spectra of N_2 193
Hydrogen peroxide
UV absorption study of solid catalysts. Interaction of framework titanium with hydrogen peroxide 203

Keto
Electronic structure of uracil and uridine derivatives studied by photoelectron spectroscopy 61

Laterites
Characterization of Venezuelan laterites by X-ray photoelectron spectroscopy 135
Line shape analysis
Si *CVV* Auger line shapes: tight binding model with inter-atomic phases 79
Look-up table
Predictions for core-level X-ray photoemission spectra of divalent and trivalent 3d transition-metal compounds 87

N_2
Selectively excited X-ray emission spectra of N_2 193

Organic polymers
XANES spectra of a variety of widely used organic polymers at the C K-edge 53

Phosphorescence spectra
The photoelectron spectra of xanthone, thioxanthone, and acridone 71
Photoelectron spectroscopy
Characteristic depth of the excitation function for Auger electrons in the noble metals Cu, Ag and Au determined by inelastic background analysis 173
Photon energy
Photon energy dependence of valence band photoemission and resonant photoemission of polysytrene 41
Polystyrene
Photon energy dependence of valence band photoemission and resonant photoemission of polysytrene 41

Resonant photoemission
Resonant photoemission of titanium 165
Resonant X-ray emission
Screening in resonant X-ray emission of molecules 125

Screening
Screening in resonant X-ray emission of molecules 125
Self-consistent field optimization
Screening in resonant X-ray emission of molecules 125
Silane
HeI photoelectron spectroscopic (PES) studies of the electronic structure for $Si(CH_3)_nCl_{4-n}$ (n = 1, 2, 3) compounds 13
Silicon
Si *CVV* Auger line shapes: tight binding model with inter-atomic phases 79
Sodium ion
Soft X-ray induced darkening of glass surfaces 75
Soft X-ray
Soft X-ray induced darkening of glass surfaces 75
Structure characterization
UV absorption study of solid catalysts. Interaction of framework titanium with hydrogen peroxide 203
Substoichiometric compounds
Electronic structure of tantalum subcarbides studied by XPS, XES, and XAS methods 179
Synchrotron radiation
Photon energy dependence of valence band photoemission and resonant photoemission of polysytrene 41

Thin metal layer
The *KLL* and *KLM* Auger spectra of 3*d* transition metals, Z = 23–26 31
Thioxanthone
The photoelectron spectra of xanthone, thioxanthone, and acridone 71
Titanium
Resonant photoemission of titanium 165
Titanium hydroperoxo species
UV absorption study of solid catalysts. Interaction of framework titanium with hydrogen peroxide 203
Titanium silicalite-1
UV absorption study of solid catalysts. Interaction of framework titanium with hydrogen peroxide 203

Tougaard method
Characteristic depth of the excitation function for Auger electrons in the noble metals Cu, Ag and Au determined by inelastic background analysis 173
Transition metal compounds
Predictions for core-level X-ray photoemission spectra of divalent and trivalent 3d transition-metal compounds 87

Uracil
Electronic structure of uracil and uridine derivatives studied by photoelectron spectroscopy 61
Uridine
Electronic structure of uracil and uridine derivatives studied by photoelectron spectroscopy 61
UV absorption
UV absorption study of solid catalysts Interaction of framework titanium with hydrogen peroxide 203

Valence band photoemission
Photon energy dependence of valence band photoemission and resonant photoemission of polysytrene 41
Vibrational excitations
Vibrational excitations in electron energy loss spectroscopy of liquids 145

$WO_x/SiO_2/Si$ (100)
Olefin metathesis catalyst. III. Angle-resolved XPS and depth profiling study of a tungsten oxide layer on silica 151

X-ray emission spectra
Selectively excited X-ray emission spectra of N_2 193
X-ray photoelectron spectroscopy
Olefin metathesis catalyst. III. Angle-resolved XPS and depth profiling study of a tungsten oxide layer on silica 151
X-ray photoemission spectra
Predictions for core-level X-ray photoemission spectra of divalent and trivalent 3d transition-metal compounds 87
XANES spectra
XANES spectra of a variety of widely used organic polymers at the C K-edge 53
Xanthone
The photoelectron spectra of xanthone, thioxanthone, and acridone 71
XPS
Characterization of Venezuelan laterites by X-ray photoelectron spectroscopy 135
XPS spectra
Electronic structure of tantalum subcarbides studied by XPS, XES, and XAS methods 179
